

QUALITY

CHOICE

LIFESTYLE

Health is an essential value

applied to daily life. Put your health first and let L.A. Spas minimize stress on your body, mind, and soul. Your choices directly affect your well-being, as well as your life long experiences. L.A. Spas has chosen to contribute to your quality of life through industry leading technologies designed to specifically increase your physical and mental well being.

We invite you to experience how L.A. Spas can maximize your lifestyle and health with hydrotherapy, calm the soul with tranquil waterfalls, and soothe the mind of all your

daily inhibitions.

Peace of mind...

The Ultimate Water Management System has set L.A. Spas apart as the industry leader in efficient water management. Silently, the Ultimate Water Management System maintains crystal clear water at all temperatures 24-hours a day. The Ultimate Water Management System combines our state-of-the-art ozone mixing system and patented Aqua Klean® filtration, leaving your water sparkling clean, fresh, and pure.

Ultimate Water Management System

The Ultimate Circulation Pump

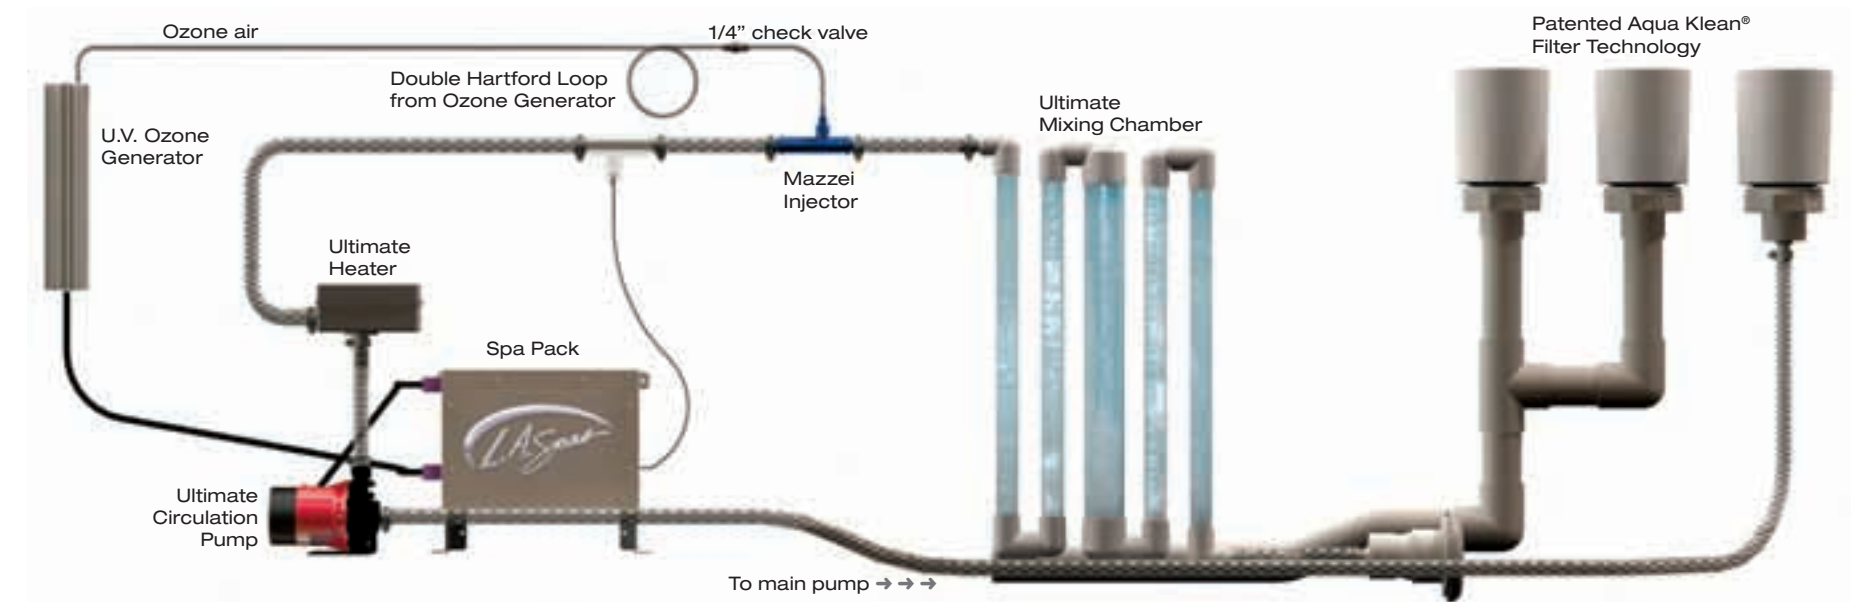

The **Ultimate Circulation Pump** is silent and only requires about half of the wattage of traditional circulation pumps. Developed for efficiency, the ultimate circulation pump is one of the most economical pumps in the industry. Energy used to power the pump is transferred into heat as it circulates the water. This design provides additional heat for your spa, allowing your heater to work less, saving you money everyday!

The Ultimate Heater

The **Ultimate Heater** is designed to allow water to pass through at maximum speed while transferring all the heat efficiently to your spa. This design minimizes mineral deposits from forming on the heater element.

The Ultimate Mixing Chamber

The **Ultimate Mixing Chamber** is essential to the L.A. Spas Water Management System. The ultimate mixing chamber design allows for maximum ozone concentration by increasing the contact ratio of ozone injected and expanding into literally millions of tiny bubbles of ozone. This will ensure maximum natural sanitization of your water, greatly reducing chemical consumption with virtually no off gas effects.

Patented
technology

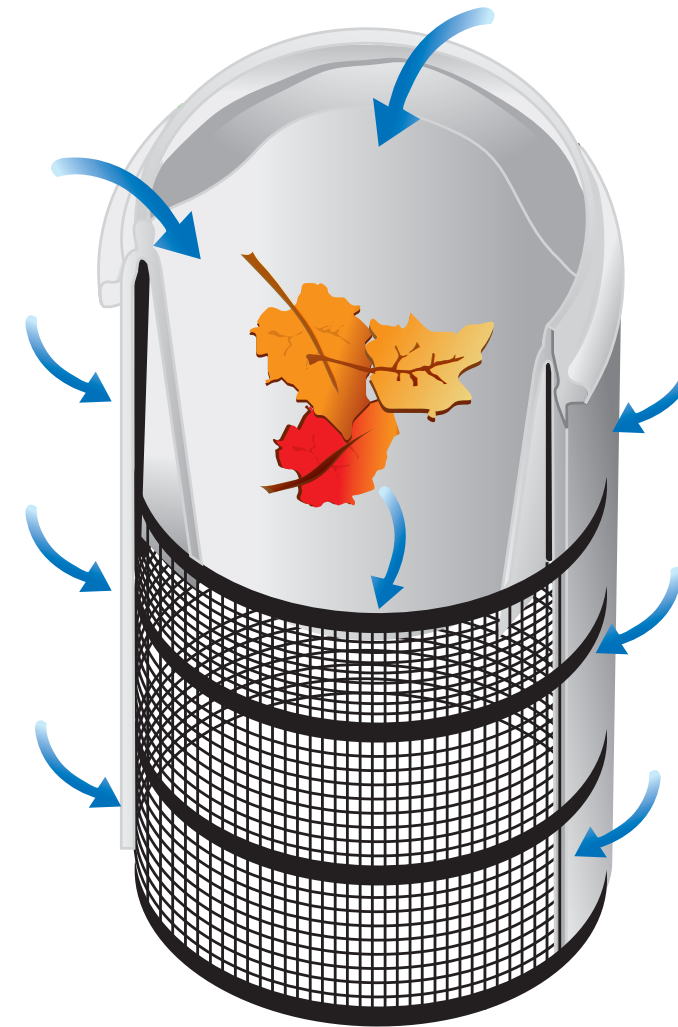

Filters
up to 568 litres per minute

Easily Cleaned
in washing machine

100% filtration
with no bypass

Aqua Klean® filtration system

Aqua Klean® filtration system is the foundation in L.A. Spas water technology and a standard on every model. The **Aqua Klean®** filtration system allows the water to flow through the filter with no restrictions, unlike conventional filters, which typically use a bypass system to achieve the same amount of flow. With other conventional systems, up to 70% of the water is forced to bypass the filtration. The maximum flow design allows the **Aqua Klean®** filtration system to filter 100% of the water through the filter for maximum natural purity.

Aqua Klean® filter traps and filters impurities and particulates, leaving your water crystal clear

Aqua Klean®

Economical

The **Aqua Klean®** filtration system is the most innovative filtration system in the industry, and also the most economical filter on the market. The **Aqua Klean®** filter costs about half the amount of conventional filters. This cutting edge technology provides the most efficient and cost effective method to maximize water filtration.

Ease of Maintenance

Maintaining your spa is as simple as running your conventional washing machine. The **Aqua Klean®** filter is designed to be placed in your household washing machine, requiring just a turn of the switch, to keep your spa crystal clear.

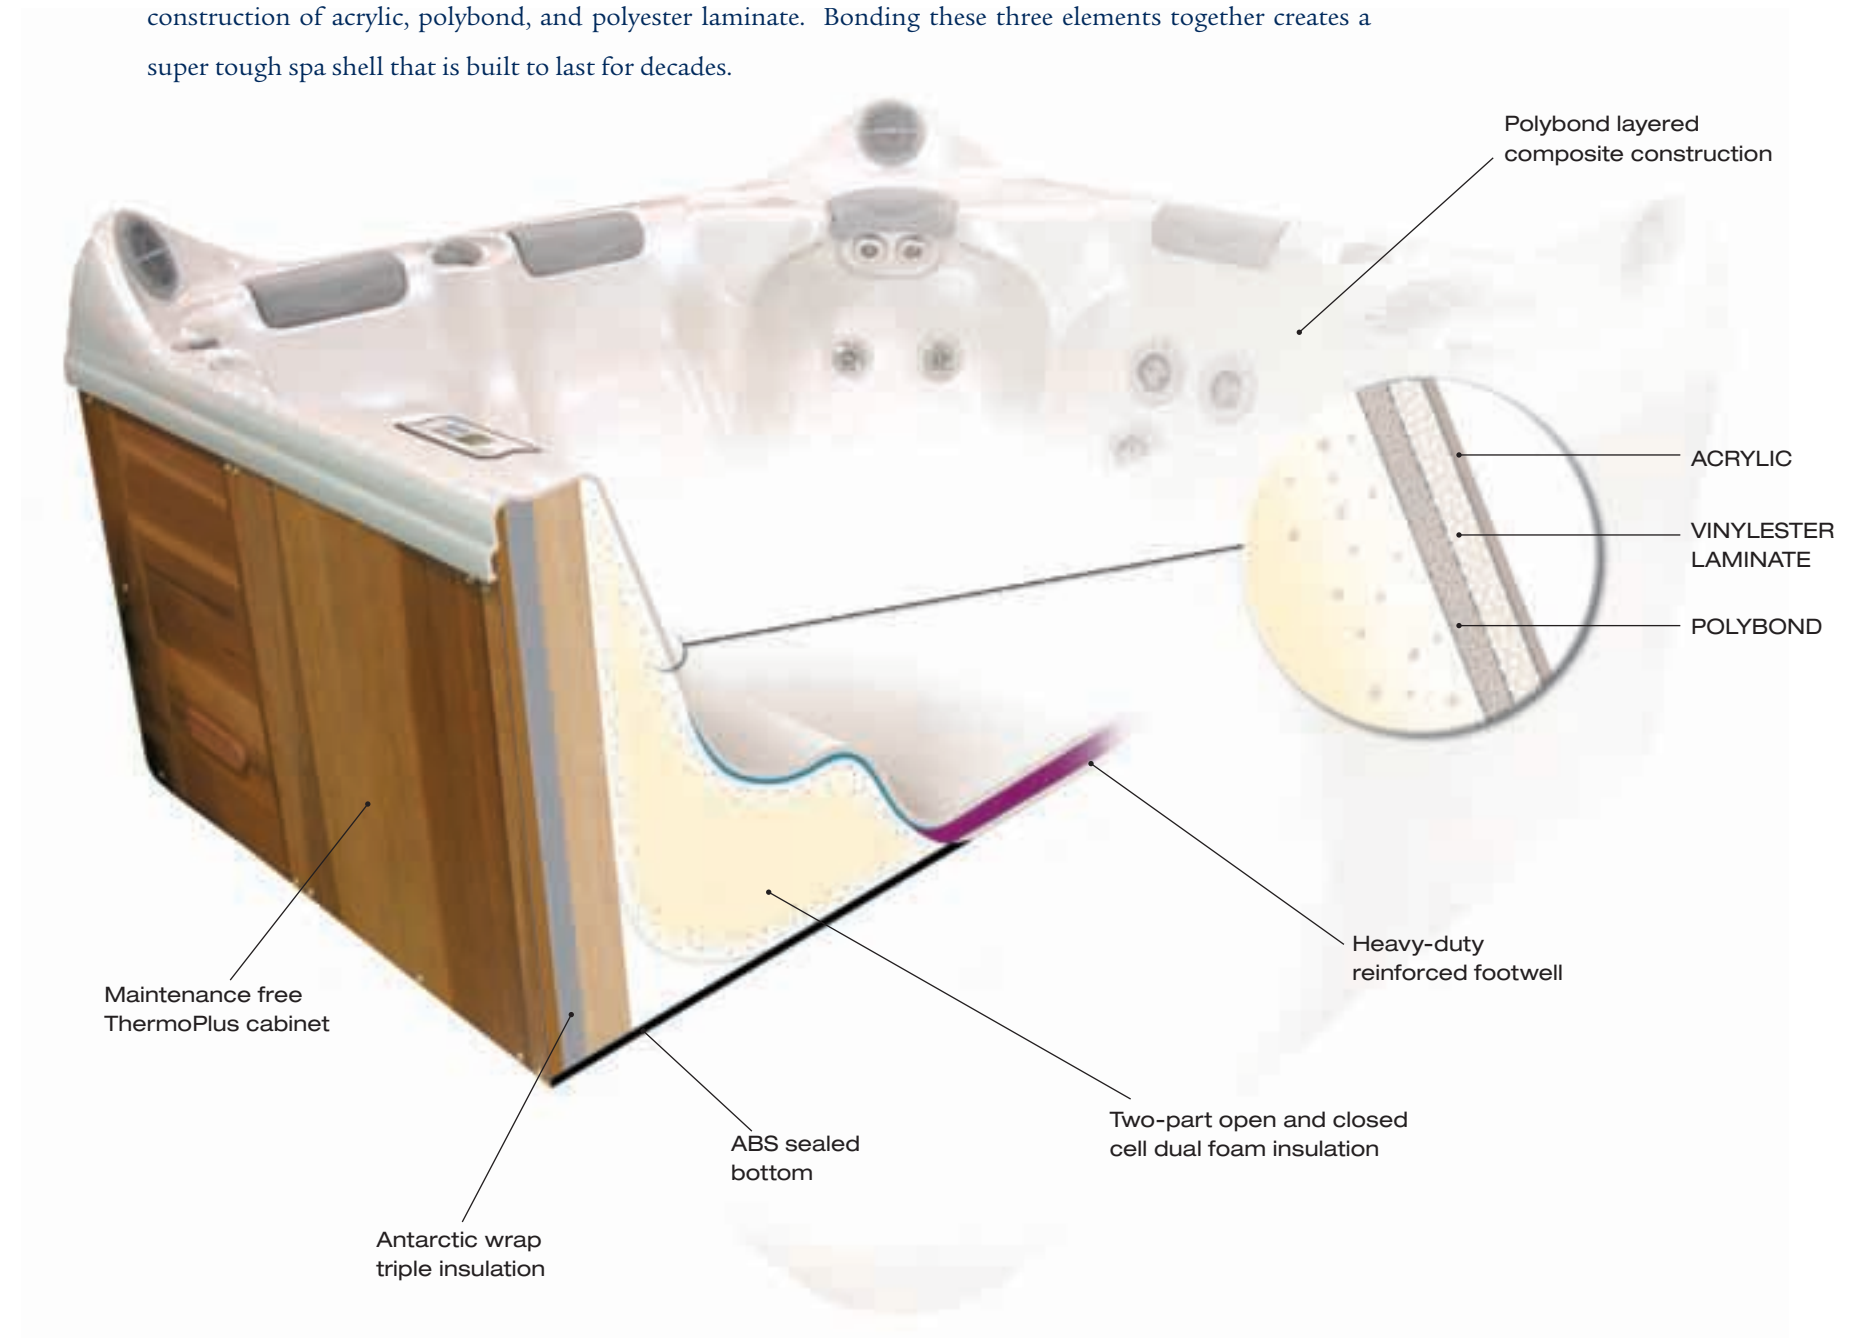

Quality components and construction

L.A. Spas uses only the finest cast acrylic surface, exclusively for high luster and lasting beauty. Solid unibody, pressure-treated wood frame and solid footwell reinforcement, provide outstanding shell stability. Our unique cabinet saver waterfall lip forces splashing water away from the spa while protecting the finish of the cabinet.

The L.A. Spas reinforced footwell is structurally designed with a mixture of layered composite material that supports the entire shell structure to rest solidly on the ground, providing maximum structural integrity. L.A. Spas sub-frames are specially built with moisture resistant pressure treated lumber that provides heavy duty long-term structural support. L.A. Spas also integrates an ABS sealed bottom vapor barrier that eliminates moisture creep. Features and options may vary from model to model, however, every L.A. Spas offers the same heavy duty construction, equipment, and materials.

L.A. Spas' shell designs start with a lustrous cast acrylic surface combined with a rugged, vinylester laminate. The result is a solid structure that retains its beauty for years. Polybond construction is a layered composite construction of acrylic, polybond, and polyester laminate. Bonding these three elements together creates a super tough spa shell that is built to last for decades.

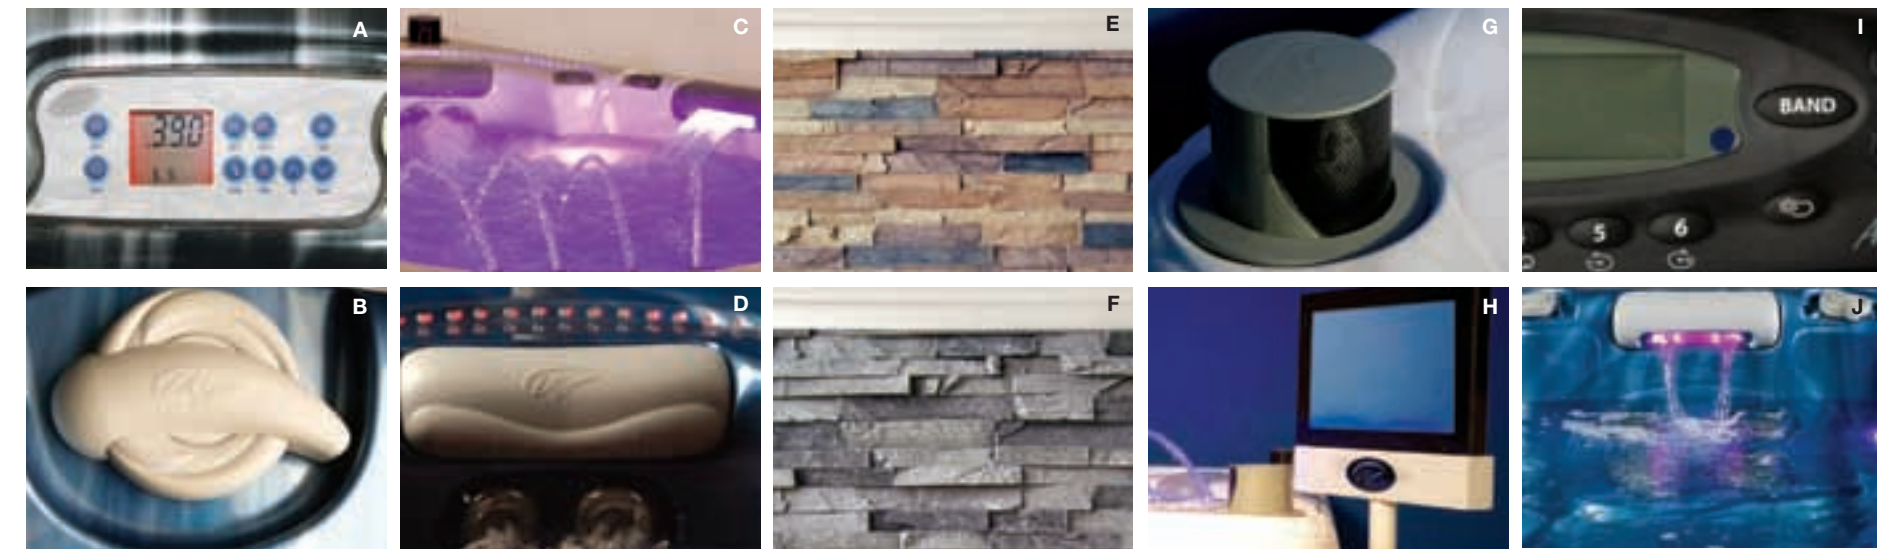

Multiple jet packages

- A. Top side control panel with L.C.D.
- B. Ergonomically designed control valve
- C. Multiple L.E.D. lighting packages
- D. Fiber optic lighting packages
- E. Autumn stack stone skirt
- F. Slate stack stone skirt
- G. Tower speaker system
- H. L.C.D. waterproof TV
- I. Waterproof DVD/MP3/CD player
- J. Waterfall option depicted with L.E.D. lighting

Premium options

Choose freely

At L.A. Spas you can have your spa “The Way You Want It.” Most manufacturers offer limited options and literally no variation of jet configurations. L.A. Spas believes you should have custom options and the ability of choice to build and configure your hot tub just for you. It’s a simple process, select the spa model that best fits your needs for comfort, decide on the right concentration of jets and features then simply pick your favorite colors. At L.A. Spas creating your personal hot tub doesn’t have to be difficult, it’s simply a matter of choice!

For more details on L.A. Spas available options, see pages 26-27.

Quadrant Therapy System

L.A. Spas has designed the **Quadrant Therapy System** to strategically place a select group of jets in specific seats to focus on the primary muscle groups in the body, including neck and shoulder, full back, arms and hands, legs and feet. Each seat is designed to deliver a specific massage including the delivery of soft or deep tissue pressure for optimum therapy. As specific acupressure points on the body are massaged, the muscle tension is released, naturally promoting circulation. By targeting acupressure points, L.A. Spas can effectively relieve daily stresses optimizing the bodies natural healing process.

Lower Lumbar Therapy Seat

Dynamic Mini Storm Jet focus on the lower quadrant of the back providing a mid-level pulsating therapy.

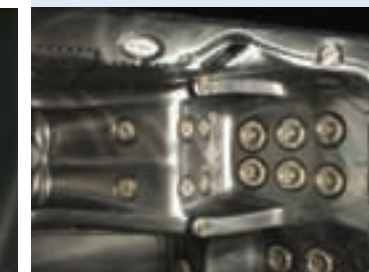

Focused Therapy Seat

Eight (8) mid-sized single-stream or rotational jets massage the entire back at a comfortable mid-range pressure.

Euroassage Therapy Seat

Indulge yourself with therapy as eighteen (18) strategically placed Euro Jets along with four (4) Mini Cyclone Jets provide deep penetrating relief, targeting the acupressure point of the neck, shoulder and back.

Magnassage Lounger

Depending on the model up to fourteen (14) fully adjustable jets massage the body from shoulders to feet. Some models provide therapeutic massage for the wrist/hands, enabling increased movement and dexterity.

Variable Wave Seat

Loaded with six (6) large Variable Wave Jets with a perfectly positioned v-shaped configuration that is designed to give you a soothing massage from top to bottom or side-to-side.

Air Injector Therapy

Provides a calming effect at the surface and a wonderfully soft bubbling sensation below while increasing buoyancy.

Therapy Collar

A deep, hydro massage relieves tension in the neck and shoulders. Four (4) 2-finger Pulsating Rotational Jets provide relief to the part of the body that carries daily tensions.

Waterfall Therapy

The sound of a waterfall creates total serenity. It's like water running down the back of your neck in the shower, except you never run out of hot water!

Whirlpool Volcano Jet

A very powerful, deep penetrating jet designed for a universal deep muscle massage, reaching multiple areas including the gluteus, hips, and thighs.

Dual Foot Jets

The most dynamic foot massage in the industry, with dual Max Massage Jets and 28 individual ports delivering over 130 gpm per jet. It's sure to revitalize those tired feet.

Lifestyle

A manner of living that reflects a person's values and attitudes. Lifestyle truly begins at home whether you wish to enjoy quiet time alone, entertain with friends or host a party. L.A. Spas is the perfect solution to dress up your backyard for a festive gathering or provide a totally serene and effortless environment for personal relaxation. L.A. Spas are a functional yet elegant way to gather friends and loved ones together for a dynamic therapeutic experience.

There's no need to worry about expensive chemicals or labor intensive maintenance, as L.A. Spas are among the easiest hot tubs to care for. With the L.A. Spas Ultimate Water Management System, your hot tub will always be sparkling clean, fresh and ready when your lifestyle demands some time to relax and recover.

Hydrotherapy

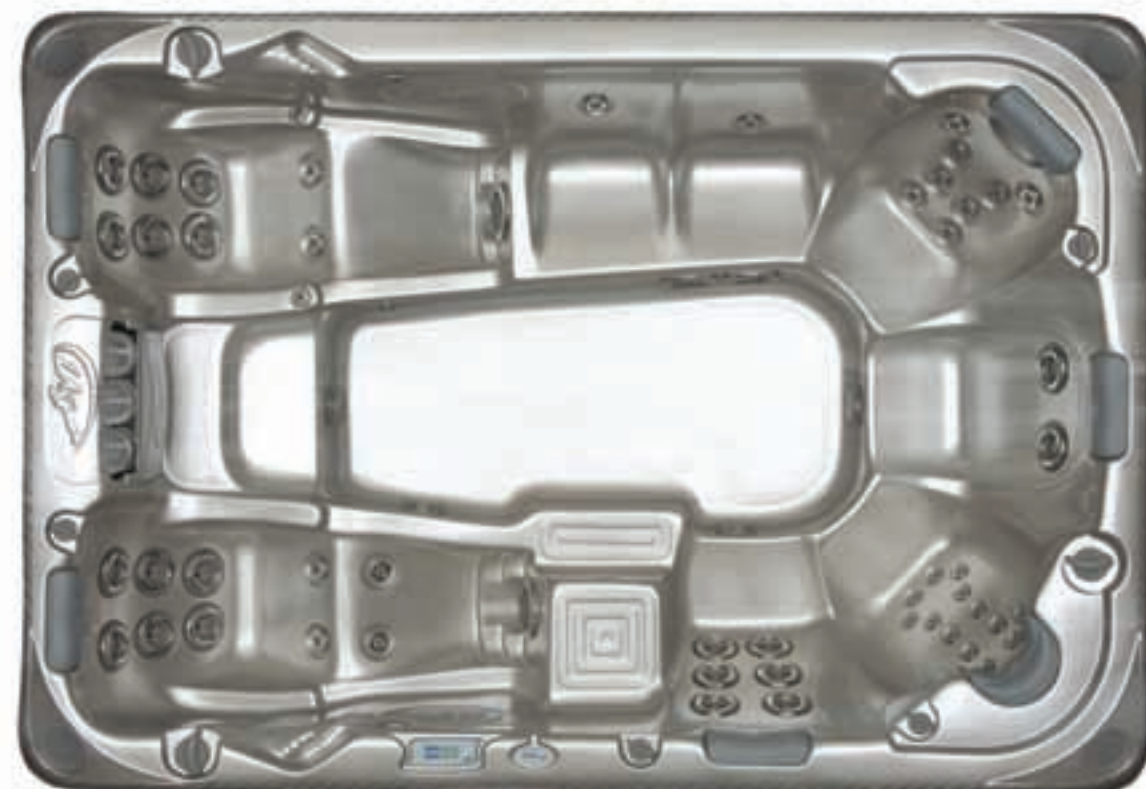

Hydrotherapy is essential to inducing relaxation, and also essential to your health. When the body is under water, it becomes buoyant which relieves pressure on the joints in the body.

Warm water and direct pressure aimed at trigger points release natural muscle relaxers called endorphins into the body. As the blood flow increases to the affected muscle groups, it carries vital nutrients that assist the body to recover more quickly. Hydrotherapy relieves stress on the mind as the body relaxes.

Textures and Colors

With the variety of standard and optional features available on every L.A. Spa, there are literally hundreds of possible custom spa configurations. Pick the options you want. L.A. Spas will custom build the spa just for you.

Premium Colors

Standard Textures

ThermoPlus Skirts

ThermoPlus designed to withstand harsh weather condition with little to no maintenance.

California Redwood Skirts

Premium Textures

L. A. Spas takes pride in using the best components in the industry, including product from the following manufacturers: Aqua-Flo, Aristech Acrylics, Waterway, and Gecko.

Eon is a low-maintenance wood alternative for decking, railing, fencing, spa cladding and other outdoor accessories. Eon products are inspired by wood and feature a wide selection of deep, rich wood tones and colors that last. Eon resists fading and staining, and won't rot, mold, split or crack.

Eon not only adds to the natural beauty of your home, but also to the lasting value of the moments you spend there. For more information, in the U.S.A. please call 1-866-DIAL-EON or visit www.eonoutdoor.com

L.A. Spas Options*

- A. Floating remote control with IR sensor
- B. Heated air injection
- C. L.C.D. waterproof TV
- D. Waterproof DVD/MP3/CD player with AM/FM tuner and surround sound
- E. Waterproof stereo system with MP3/CD player and AM/FM tuner
- F. Tower speaker system
- G. Summit speaker system (shown with fiber optic lighting)
- H. Ultimate FX water package
- I. L.E.D. backlit waterfalls
- J. Stainless steel jet escutcheons

Additional options

- Ultimate Water Management System (see page 5)
- Therapy collar (shown on page 13)
- Hydrocise exercise kit (not shown)
- Subwoofer (not shown)
- Autumn stack stone skirt (shown on page 11)
- Slate stack stone skirt (shown on page 11)

* Some options not available on certain models. See dealer for specifics on options.

L.A. Spas reserves the right to change options and features at its sole discretion and as necessary in an effort to insure on-time delivery and improved quality in our finished products.
